EDUCATION

Instituto Tecnológico de Software

TSU in Software Development and Innovation

Mérida, Yucatán, Mexico

Aug. 2025 – Present

PROJECTS

Portfolio | *Antigravity, Markdown*

Jan. 2026

- Interactive portfolio developed to showcase backend architectures, clean code practices, and cloud infrastructure projects.

SkillVault | *C#, .NET Core, Entity Framework Core, PostgreSQL, REST APIs*

Feb. 2026 – Present

- Developed a backend certification tracker with Hexagonal Architecture and **.NET Core**, designing a normalized PostgreSQL schema (1:N relations) via **Entity Framework Core**.
- Designed **RESTful APIs** and automated CI/CD pipelines via GitHub Actions, deploying on AWS EC2 and RDS.

PokéBattle Terminal | *Java, OOP, Design Patterns, Git*

Oct. 2025

- Engineered a terminal-based battle system in **Java** applying OOP, Factory pattern and domain package structure.
- Co-designed combat logic and UML diagrams, ensuring **clean code** and version control collaboration using **Git/GitHub**.

ACTIVITIES & LEADERSHIP

Student Branch Treasurer

Feb. 2026 – Present

IEEE — Instituto Tecnológico de Software

Mérida, Yucatán

- Managed branch finances, budgeting, and coordination with chapter leadership to support technical events and student professional development.

1st Place Winner — IFTP University Competition

2026

AURA Project — Atmospheric Water Harvesting System

Mérida, Yucatán

- Led technical development of AURA, a passive atmospheric water harvesting system targeting rural communities in Yucatán.
- Achieved 1st place at university level and 3rd place overall among competing institutions.
